RE: Application for Software Developer

To whom it concerns

As a young adult and self-motivated individual, I am interested in applying for a software developer position with Concept software and services where my education and acquired skills will be utilized to their best to improve the company's overall performance.

I am aware that you will receive a large number of applications for this job, but I would very much appreciate the opportunity to demonstrate my capabilities to you in person. I believe that I have a lot to offer your organisation. I am keen to develop my professional skills and look forward to discussing my application with you at an interview. I have enclosed a copy of my resume with a link to my portfolio for your consideration. I can be contacted at all times on the details provided above.

Please let me know if there is any other information I can offer to support my candidacy for the position; I hope to hear from you soon.

Yours sincerely,

Brian Shisanya

INTRODUCTION:

I'm a junior developer ready to enter the major leagues. My professional ambition is to stay versatile and able to fill different roles within a product group. As such I have been learning different technologies across the entire .net development stack from front-end UI work to database design. Though I am applying for my first professional role as a developer I have developed a portfolio containing several web and computer applications to showcase my abilities; The link to the portfolio is linked below. I am eager to hit the ground running in an established team.
